Subject: Re: USGS Data

Hi Jan - there's a database that goes along w/

<http://pubs.usgs.gov/pp/1651/>
Integrated investigations of environmental effects of
historical mining in the Animas River watershed, San Juan
County, Colorado: U.S. Geological Survey Professional Paper
1651

Its too big to email - I'd put it on our ftp site but can't do
that from home. Here's how you get it:

go to <http://pubs.usgs.gov/pp/1651/>
click on "Downloads Directory" on right side
click on rel-db.zip to download zip file
unzip
access database is in folder animas_cd/rel-db/mdb
filename is : AnimasAMLI.mdb

let me know if you need any help finding what you need. I took
a gander and some things look fine -- there's data for A72, for
example. But other things have me scratching my head - CC48,
which I would think is the Cement gage, is listed as a Prospect
Gulch spring.
